PRODUCT SOLUTIONS

I CCTV Systems

Our proficient knowledge and wide range of offering in CCTV Cameras give us a leading edge in providing the solutions for Standard, Analytical and Industrial Solutions.

Our Solutions for Surveillance:

- Intelligent Video Analytical Solutions:
  The Intelligent Video Analytical Surveillance is a comprehensive solution for the government & critical monitoring area with analytical protection such as Object Detection, Face Detection, Over Crowd Detection, People Counting, Video Quality & many more, with the system generating the real time pre-alert & action to enhance public safety, security and assets.

- Storage:
  Now a days Surveillance is Top Most Important system at any Infrastructure and digital storage of past footage is even more critical for any organization. We provide suitable storage based on client requirements whether it's including internally on the camera, externally on a hard drive or other storage device, or digitally in the cloud.

- VMS:
  Video management software has increasingly been used for solutions that go well beyond security. Start from small buildings to infrastructure like large Campus, spread buildings, remote locations Camera Management is tedious task for any Facility manager, Security Manager or IT Manager, hence Video Management is must have system at any premises.

  With VMS you can Monitoring Health of Camera & Storage, Get Alerts from critical Camera, Manage small to large scale Surveillance Set up, Generating Reports for Security Audits. All of these functions will allow organizations to support made their day to day operation smooth and more accurate.

PRODUCT SOLUTIONS

II Pre & Post Fire

Pre Fire Detection system

- **Explosive Fire System Solution** – Where the installations are vulnerable to the risk of explosion in order to protect the valuable assets and people.
- **Intelligent/Addressable Fire System Solution** – Where the site demands large quantity of devices to identify the exact location of fire and the quickest action to control fire & system.
- **Conventional Fire System Solution** – Zone based system that identifies a fire threat level in a particular zone–for medium to larger set up.
- **VESDA Fire System** – For sites where application for very early detection for challenging applications, is crucial.
- **EVAC System** – Evacuation system is use for rescue and fire in high rise/Public buildings. EVAC Helps occupant to vacant the building or move to the safe places in case of Fire or in Emergency situation.
  EVAC is Important system in public buildings like Hotels, Hospitals, Transportations facilities and many more.

  EVAC can integrate with Fire Alarm System and useful for Mass Notifications.

- **Fire Fighting Telephone System** – The fire telephone system is primarily **a method of communication between firemen during an emergency.** Usually used for fire evacuation purposes for High Rise /Public Buildings.

  This telephone system allows Fire Fighters easy communication with the main control panel.

  We provide Comprehensive solution of FAS, EVAC and Fire Fighting Telephone system.

Post Fire Control System

- **Fire–Hydrant System:** – Water based suppression system for high end & medium pressure jack.
- **Water Mist System:** – Low pressure fine mist /spray system.
- **Fire Extinguisher System:** – For electrical, water, petroleum fire hazards, compliance with all the fire regulation & suppression types.
- **Fire Sprinkler System:** – Overhead sprinkler distribution systems.

- **Gas Suppression System:**– This system is utilized especially for enclosed high value asset a, such as delicate equipment rooms, currency rooms, document rooms, libraries etc.
- **Gas Flooding System:**– CO2 used as Gas Flooding system which facilities rapid discharge and allows three dimensional quick penetrations in the entire hazard area.CO2 at atmospheric pressure is colourless, Non Conductive and odourless. This will reduces Oxygen content from the Atmosphere.

PRODUCT SOLUTIONS

III Public Address

Public Address systems

- **Standard / Analogue :**

  Overhead paging system in general areas for music & announcement with limited functionality.

- **IP/SIP :**

  For large, fully addressable & scalable centralized control, manage, alarm, signal zone & multi zone distribution, integration with other systems.

- **Hazardous Environment:**

  Where the environment itself is very hazardous and protection of human lives in best & quickest way is critical through a system that works under extreme conditions, either in Single or bi–directional way of Audio Transmission.

PRODUCT SOLUTIONS

IV Time Attendance & Access Control

Time Attendance

- Time Attendance
- Canteen Management
- Long Range Time Attendance
- Face Recognization

Time Attendance System is developed by keeping different type of industries in mind. It includes the options to customize and implement different policies related to attendance, leave and shift. By implementing Time Attendance System one can seamlessly manage the attendance and have data to process payroll.

Quick Features:

- Rugged Fingerprint Algorithm
- Superior Verification Technique
- Card based Recorders
- Multiple Card Formats
- Inbuilt TCP/IP Network Interface
- Aluminum Die Cast Enclosure

Access Control

- Access Control
- Visitor Management
- Long Range Access Control
- Elevator Control
- Hotel/Lock
- Door Interlocking
- Software

Access Control System is designed to facilitate control over the accessibility of restricted areas at a facility. Our Access Control System assists in maintaining employee management, online tracking, controlling user access on different doors etc. Our solution ranges from Single door access control device to Multi door access control panels.

Quick Features:

- Online access monitoring and control
- Control all the doors at any given time with logging all the entries
- Allow the administrator to manage and record employee attendance
- Record and report all the entries of users and cards electronically
- Anti Pass Back
- Door Interlocking Access

PRODUCT SOLUTIONS

V Voice & Data

- **VOICE (EPABX/ IPBX):** It can be utilized as a switching system for calls that enables both internal as well as external switching functions in an organization.
- **IT– SWITCHES SERVER AND STORAGE CYBER SECURITY WIFI:** infrastructure and now a days many systems depend on it, whether it's a Building, campus or entire Corporate houses. It connects computer and other Voice Data, Video devices through systems such as local area networks (LAN) wide area networks (WAN) internet and internet communications systems.

- **FTTH:** FTTH allows a technology shift from existing copper cabling systems to Fiber, providing an almost unlimited transmission rate. Can Run All Services Like Internet, Data, CCTV, EPABX, IP TV.

VI Home Automation

- **Video Door Phone:** For Visual Access and entrance systems scenarios, Either for Point to Point or Point to Multipoint access and entries, Sound & Video inter communication system, for authorized entry in to premises.
- **Intruder Alarm System:** An intruder alarm system monitors & detects unauthorized entry to the premises either at a home or at a place of business. Also it can be programmed for authorized third party entry upon approval status as needed.
- **Audio Video Solution & Lighting Control:** We offer professional solutions in high performance Audio/ Video integration Projectors, Displays, Video Walls, Projection Screens, Amplifiers, Mixers, Speakers, Surround Sound and High End Audio Systems.

VII Entrance Automation

- **Door Frame Metal Detectors/Handheld Metal Detector:** These devices are used for entry into a facility where an entire body is scanned for person carrying Metal, different sensitivity can be adjusted to allows a certain amount of metal on a body and can be used to identify heavy metal objects hidden on a body or in a hand carry bag.
- **Gate Automation:** Gate Automation system allows entry of people vehicles in a single file, controlled entrance and exit of a crowd populated area. The system can restrict and approve the through fare from gates, turnstile, barrier and Bollard.
- **Under Vehicle Surveillance System:** It scans vehicle's bottom chassis for hidden explosives & modifications. It produces superior image & processes the algorithms that will help in detecting & modifying with externally added components in the bottom chassis of a vehicle. It is also integrated with License Plate recognition system.
- **Baggage Scanner:** We provide Baggage scanner as per Different sizes and Usage. You can keep a check on random baggage and detects any suspicious objects and can keep away the prohibited items from any crowded or public place. The safety perception of the visitors also increases with the baggage scanner. Tunnel sizes of Baggage Scanners are depends on Applications. All Data can be stored in PC with the help of Software which can be review later on as required.

PRODUCT SOLUTIONS

VIII Power

- **UPS:** We Provide UPS Solutions To Protect Critical Loads from Power Fluctuations, Spikes and Mains Power Failure. UPS Will Provide Continuous power to critical applications and sectors like Banking, Data Centers, Operation Theatres, Security Systems, etc. Any unexpected power failure shall cause damage to these sophisticated equipment. Use of UPS Save Time, Prevent Data, Save our critical equipment.

- **DG SET:** Diesel Generators are useful engine for long power back up, DG can be used with long hrs. power backup. DG Can be used at Remote Place, Healthcare, Hospitality, Manufacturing Industries. We can design power back up as per client's need, DG's are available with all Essential features eg. Diesel Level, Information about Phases ,Power generated.

IX BMS
(Building Management System)

- **BMS** (**B**uilding **M**anagement **S**ystem) A building management system (BMS) is a complete integrated control system that can be used to monitor and manage the Mechanical, electrical and electro mechanical services in a facility.

X Audio Video

- **Pro Audio Solution:** Our Pro Audio division specializes in providing comprehensive audio solutions for Banquet, Auditorium, Discotheque , Theaters, Meeting rooms, Board & Conference Rooms, Religious Places, Stadiums and others. We provide solutions with latest technology and as per customer's requirements

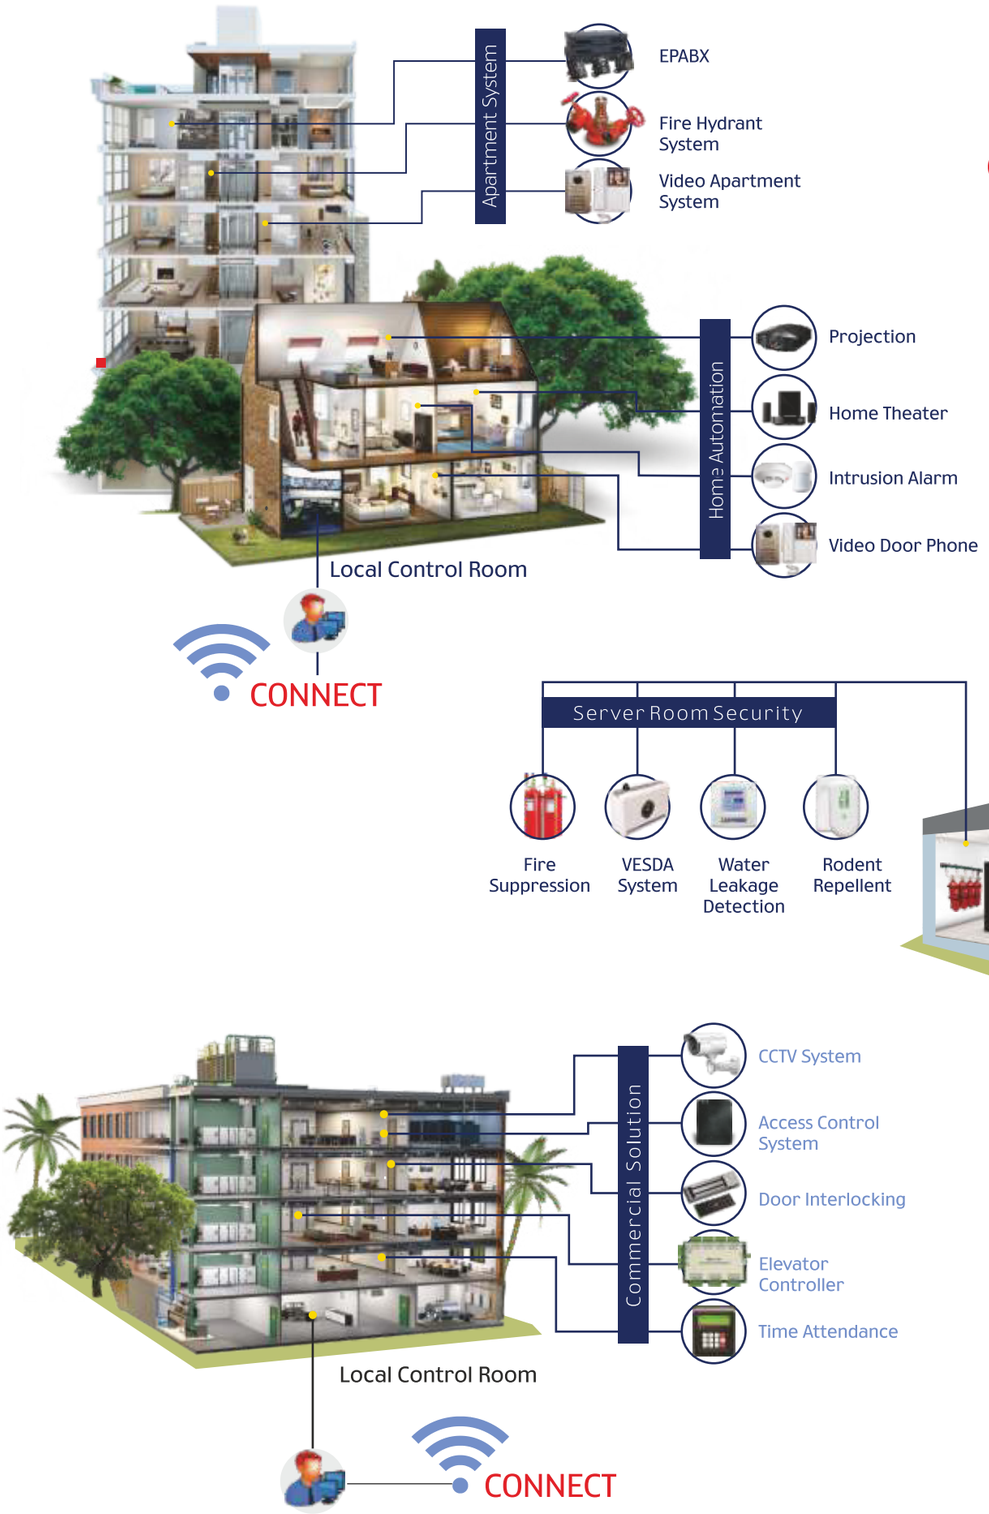

- **VIDEO WALL/LED:** Used Primarily in a Command and Control room, it provides the multi-monitor control & management center and consists of multiple or single inputs divided in separate or multiple monitor at the same time for bigger displays options.

- **DIGITAL SIGNAGES– LG/SAMSUNG:** Digital signage are useful to display any Content to the Targeted Audience. Digital Signage's Application can be at Public Places, Transportation, Stores, Malls, Restaurant, Corporate Houses & other places too. These can be use for Way finding, Menu Display, Advertising, Marketing, Important Information etc .

We integrate your world

CYBER
Executions without Excuses!

PRODUCT SOLUTIONS

XI Hospital Products

- **Wired & Wireless Nurse Call System:** A patient's care system that has dedicated voice and it can also be programmed for emergencies, an Alert communication system between a patient and a Nurse Station at a hospital
- OPD System
- Bed Head Panel
- Cubical Curtain
- OT Pendant
- OT to Conference room AV Solution

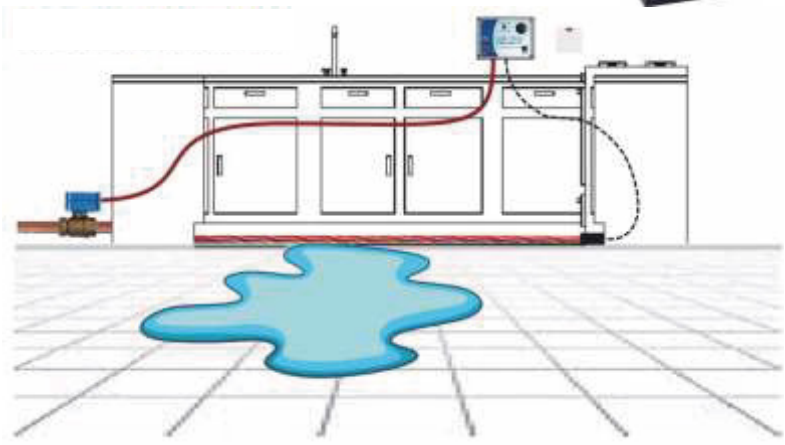

XII Server Room

- **Water Leakage System:** A water leak detector detects the Presence of water and provides an alert in time to allow the prevention of water damage.
- **Rodent Repellent System:** The electronic rodent repellent creates an intense auditory stress for all kind of rodents and repels them permanently with high frequency sound waves.
- **Smart Rack Solution:** "We provide Smart Racks Solution as a part of Trunkey solutions. Smart Racks are the Best Suitable solution for Server room / Switches where we have limited Servers & Switches. Smart racks are Modular type hence whatever components we required we can get it.Smart Racks are having inbuilt Safety & Security systems, Access Control, Fire Suppression Systems, UPS etc.It also occupy less space and easy to install solutions. Appropriate for small to medium offices. "

SPECIAL SOLUTIONS

XIII **FIRE DOOR:** Fire doors are one of the most important Passive fire safety products on your property. They help prevent fire and smoke from spreading throughout the building, while giving occupants time to evacuate. Fire doors are part of an essential requirement for public buildings, offices and factories. The simple purpose of a fire door in every day use is just as any other door.

XIV **FIRE SIGNAGES:** The purpose of emergency lighting is to ensure adequate lighting is provided when the power supply to the normal lighting fails. Emergency lighting is key in making sure people can exit a building safely in the event of an emergency. Emergency lighting illuminates the means of egress which includes stairs, aisles, corridors, ramps, and escalators leading to an exit.

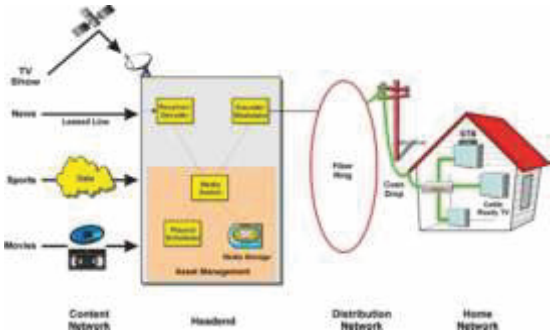

XV **CA TV / MA TV / IP TV:** We provide Distributed TV Solutions as per Client's Requirements. We can offer following TV Systems.

CA TV– CA TV is Traditional TV System from Home to Home/Room to Room using Coaxial Cable connection. TV Signal distribute thru central point or head end.

MA TV– A MA TV system enables TV signals to be distributed to a large number of TV receivers, as opposed to individual antennas for each TV, In MA TV you can in corporate Global channels along with Local Channels.

IP TV– IP TV use to broadcast media content thru Ethernet, Using large internet bandwidth, various broadcasting contents like TV, Signage, Video on demand etc can be delivered to end–user using a single UTP cable.

XVI **Automated Weighbridge and Tracking System:** We Provide customized Automation of Weighbridge solution for multiple Weighbridges. Thru this Automation we can control / Restrict un authorized entries of Vehicle, Get Entire Details of Vehicle along with Type of Material.

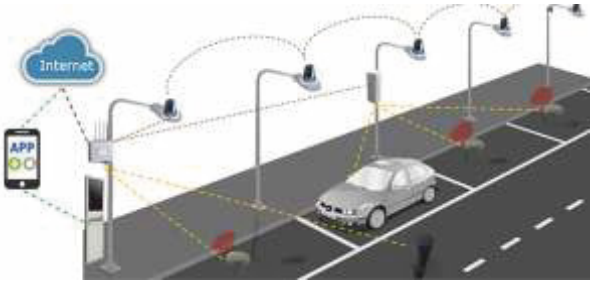

XVII **PARKING MANAGEMENT:** In today's world, optimum space utilization and ability to rapidly park vehicle are the most crucial factors in a parking space.

Ultrasonic Sensor based System– An ultrasonic sensor which measures time by emission of sonic signal and determines the presence of vehicle via return of its echo. Detection and count of available parking spaces.

Camera Based System– Camera–based PGS is a comprehensive and innovative solution for modern car parking needs with features like 'Find Your Car' and 'Parking Guidance'. Drivers are able to get parking info from Vacancy Displays and LED Indicators and can also locate their vehicle on 'Find Your Car' terminals.

Outdoor Magnetic Cum IR Sensor Based– This Parking Guidance Solution consists of a network of wireless outdoor Magnetic IR sensors that are able to detect real time occupancy status and the duration of parking, ensuring optimal parking utilization, reduction in vehicular emissions and a high ROI.
